

Table rest

Clip onto top section of your Switch Stick by pulling apart side wings and pushing onto the shaft of the stick (you may need some help with this as its quite tight, especially the first time you use it).

For most secure hold, position the table rest underneath the table/counter top and sliding table rest up the stick shaft until it sits securely under the table top

Or to rest on table top, rest the stick on the rubber bung on the edge of the table, balancing your stick.
